

Qorpak Introduces Thermal-Resistant 250cc Borosilicate Glass Jar To U.S. Labs And Museums

Multi-Purpose Jar, a Qorpak Exclusive, is Ideal for Fluid Preservation; Wide Mouth And Straight-Sided Round Shape Provides Greater Utility, Easy Viewing of Contents

CHICAGO – (November 15, 2016) – Qorpak, a division of [Berlin Packaging](#) and a longstanding trusted provider of packaging and laboratory supplies, today announced the immediate availability of its new 250cc straight-sided, wide mouth borosilicate glass jar. The high-performance jar, a U.S. exclusive to Qorpak, gives customers in fields ranging from chemical manufacturing and laboratory research to natural history and medical museums a thermal- and chemical-stable workhorse for storage of specimens and liquid chemicals.

Thanks to its 70mm wide mouth opening and lack of slanted shoulders, the glass jar offers easy viewing of contents as well as convenient access and storage. Qorpak's product research indicated a strong demand for the shape and material of the new jar, manufactured from Type 1 borosilicate glass. Type 1 borosilicate is more resistant to temperature changes than regular glass and provides a greater assurance of the content's integrity. The material is commonly used where clarity and chemical durability, as well as thermal stability, are required.

“Our new 250cc borosilicate glass jar will be a game changer for customers seeking the quality of borosilicate with the functionality of a standard packaging bottle, at an affordable cost,” said Karen Brooks, Qorpak vice president. “Anyone familiar with the recommendations in ‘Fluid Preservation: A Comprehensive Reference’ by John Simmons knows how important shelf-stable glass jars are to specimen preservation. This jar will satisfy those kinds of long-term storage needs exactly.”

Qorpak's new multi-purpose borosilicate glass jar is available in a 12-count case, and can be purchased either alone or paired with green thermoset F217 and PTFE-lined caps. Other cap and liner materials are available. The jars can be distinguished from regular jars by the Qorpak borosilicate logo on the bottom.

To learn more about Qorpak's 250cc borosilicate glass straight-sided round jars, or to purchase, go to <http://www.qorpak.com/borosilicatejar>

About Qorpak

Qorpak, a division of [Berlin Packaging](#), is a leading worldwide supplier of laboratory containers and supplies. For more than 30 years, Qorpak has served laboratory, research, and testing professionals through its own expert sales and service team as well as through an international

network of distributors. In addition to thousands of types of containers and closures in plastic, glass, and metal, Qorpak sells commonly used chemicals, supplies, and benchtop equipment. Qorpak is a one-stop shop, with a majority of these products in-stock and ready to ship. Qorpak is a Hybrid Packaging Supplier® in the laboratory marketplace, as Qorpak brings together the best elements of manufacturing, distribution, and income-generating service providers.
