ARE YOUR BOTTLES CLEAN?

Do you see any loose dirt, dust, carton lint, fine glass particles or other foreign debris inside the bottles? Do you have quality inspections that show particles of unknown origin? Are you receiving complaints from customers who need visually clean bottles?

FEATURES OF V & I

Qorpak's proprietary Vacuum & Ionization (V & I) process is an economical option for visibly clean containers. With the addition of merely pennies to your invoice, you will receive bottles and jars that remain free from visible particulate throughout the entire shipping and storage process.

BENEFITS

Cost-Effective – adding only pennies to the cost of the bottle

Time Saving – containers do not need to be washed in house

Cleanliness Sealed into Each Bottle – closure immediately attached after the process is complete

Odor Free & Tasteless – will not interfere with product or test results

Quality Guaranteed – process is performed in our ISO 9001:2015 facility

APPLICATIONS FOR THE V & I PROCESS

- Chemical and Resin Sampling
- Small Filling Line Operations
- General Lab Use
- Lipid Manufacturing
- Pharmaceutical & Medical Device Kitting & Manufacturing
- Isotope Producers
- Polymer Manufacturing
- Small Molecule Producers
- Fuels
- Electronic Component Manufacturing
